

# Beava® Waterproofing Kit Installation Guide

## A SUPERIOR **ONE COAT** METHOD

**Beava® WATERPROOFING MEMBRANE** is a highly advanced one coat tanking system. Easy to apply, fast drying, flexible and waterproof with excellent crack bridging properties.

### Simple to apply:

1. Please view areas required to be waterproofed, in darker blue, on illustrations overleaf.
2. Make sure that area to be waterproofed is clean and dry.
3. Prime the area with one coat of **TANKING PRIMER** diluted as instructions on bottle.
4. When primer is dry, apply tape to corners and any joints from wetroom trays to floors.
5. Apply one coat only of **Beava® WATERPROOFING MEMBRANE** to the primed area. Tiling can commence when **Beava® WATERPROOFING MEMBRANE** is dry, approximately 2 hours, depending on site conditions.

These instructions are for guidance only. As conditions of use and any labour involved are beyond our control the end user must satisfy himself by prior testing that the product is suitable for his specific application. No responsibility can be accepted or any warranty given by our representatives, agents or distributors.
